

## Late-Breaking News

### Production Notes

Mimi Burbank

This is the final issue of 2002, and represents a double issue. We are slowly making progress toward catching up, but we still need articles.

Some new members have joined the *TUGboat* production team—Karl Berry, our new President, and William Adams, who is the editor of the 2003 conference proceedings.

Karl and Robin Laakso have been soliciting articles and we have had a wonderful response from the T<sub>E</sub>X community. Thanks to all of you who have responded to the call for articles; we hope many more step up and submit papers. For more information about how to do this, please refer to the *TUGboat* web page: <http://www.tug.org/TUGboat>.

**Output** The final camera copy was prepared at CSIT on a Debian Linux computer, using the *T<sub>E</sub>X Live* 2003 setup, i386-linux, which is based on the Web2C implementation of T<sub>E</sub>X, version 7.5.2.

One curiosity occurred with production of the Beccari article on Typesetting classical Greek philology (p. 276). T<sub>E</sub>X's output routine insisted on producing the running heads in Greek—until I realized that I could achieve the same output if I forced a page break where I needed it, and the running heads reverted to the usual roman. Whew.

All of the articles contained in this issue were generated as PDF files, many by PDF<sub>T<sub>E</sub>X</sub> or ps2pdf. We also used ConT<sub>E</sub>Xt macros to overlay multiple pages, where one article ends and another begins on the same page; these were kindly provided by Hans Hagen. This is the first time our printer has not had to strip pages for us. Thank you Hans!

**Coming Next Volume** Coming in 2003 will be the proceedings of the 24<sup>th</sup> annual meeting of the T<sub>E</sub>X Users Group, held at the Outrigger Waikoloa Beach Resort on the Kohala Coast of the Big Island, Hawaii. Also in 2003, we plan on providing the proceedings of EuroT<sub>E</sub>X 2003, thanks to Yannis Haralambous.
