# The Pleasures of Chess

by Assiac

## The PLEASURES of CHESS

PRESIDIO SERVICE CLUB  
San Francisco, Calif.

*George Koltan*

HIS MAJESTY, HIS OFFICERS AND MEN

The only thing Black can do is to try an escape by, say, R—K<sub>4</sub>, but the White Bishop, by sacrificing himself, retrieves the fugitive Rook, and so contrives the end:

- 5. B—B<sub>5</sub> ch R × B
- 6. Kt—K<sub>7</sub>!!!

If there is one thing we can learn from this pretty study it is this: that Rooks should work as a team and should beware of being cut off from one another.

Here is a famous little game to exemplify the point. The winner is the great Morphy, and his opponents were the Duke of Brunswick and Count Isouard, playing in consultation. The game was played in 1858 in the Duke's box in the Paris Opera House during a performance of *The Barber of Seville*:

- |                       |                     |                           |                    |
|-----------------------|---------------------|---------------------------|--------------------|
| 1. P—K <sub>4</sub>   | P—K <sub>4</sub>    | 10. Kt × KtP!             | P × Kt             |
| 2. Kt—KB <sub>3</sub> | P—Q <sub>3</sub>    | 11. B × Kt P ch           | QKt—Q <sub>2</sub> |
| 3. P—Q <sub>4</sub>   | B—K <sub>5</sub> ?  | 12. O—O—O                 | R—Q <sub>1</sub>   |
| 4. P × P              | B × Kt              | 13. R × Kt!               | R × R              |
| 5. Q × B              | P × P               | 14. R—Q <sub>1</sub>      | Q—K <sub>3</sub>   |
| 6. B—QB <sub>4</sub>  | Kt—KB <sub>3</sub>  | 15. B × R ch              | Kt × B             |
| 7. Q—QKt <sub>3</sub> | Q—K <sub>2</sub>    | 16. Q—K <sub>8</sub> ch!! | Kt × Q             |
| 8. Kt—QB <sub>3</sub> | P—QB <sub>3</sub>   | 17. R—Q <sub>8</sub>      | Mate               |
| 9. B—KK <sub>5</sub>  | P—QK <sub>4</sub> ? |                           |                    |

Perhaps the Duke and the Count could plead the extenuating circumstance of being disturbed by Rossini's music. Morphy, at any rate, provided a spectacle truly in the style of Grand Opera.

How magnificently Rooks can fight each other is beautifully illustrated in a study by Saavedra (1895), probably one of the most instructive studies in Chess literature. (See next page.)

White is to move and win. He pushes the Pawn, of course, and it seems hopeless for the Rook to stop it. Yet a Rook can command powerful resources as we shall soon see. Black obviously plays
