Font charts for the cm layout*

Matthias Clasen
clasen@mathematik.uni-freiburg.de

Printed January 27, 1998

I will insert a table showing the fonts mappings like

$$\texttt{symbols} \longrightarrow \texttt{MC/cm/m/n} \longrightarrow \texttt{xma}$$

once I have figured out how to find the NFSS spec associated with a symbol font.

In the following tables, the symbol ⓘ is used for control glyphs and the symbol ⓘ is used for missing glyphs. All empty slots except for 32 are unassigned. Slot 32 is a digit-width space.

*This file is part of the mathfont package v0.58, dated 1998/01/27.
